OCTOR SAYS ONE **LUNG IS HEALED AND** OTHER NEARLY SO

Urges patient to keep up the treatment that did the work.

'I had consumption of the lungs for six years. I had an outside screened-in sleeping room, and remained out in the open air nearly all the time. I used six raw eggs a day and about a gallon of milk. I had a great many hemorrhages, and was just barely able to walk around the house a little.

"I began taking Milks Emulsion in June. I have now taken my eighteenth bottle and feel greatly benefited. I had my doctor examine my lungs the other day and he said that one of them is entirely healed up and the other one nearly so. He urges me to keep on using Milks Emulsion, which I intend to do. My original weight was 170 pounds. I have regained most of it, now weigh 160 inds and feel almost as strong and good as I ever did. My only regret is that I didn't hear of Milks Emulsion six years ago."-Grady Dees, Magnolia, Ark. Whether Milks Emulsion would succeed as well for you as it did in the above case is easy for you to find out. It is at least bound to benefit you, and it

costs nothing to try it. Milks Emulsion is a pleasant, nutritive food and a corrective medicine. It re-stores healthy, natural bowel action, doing away with all need of pills and phyics. It promotes appetite and quickly puts the digestive organs in shape to assimilate food. As a builder of flesh and strength, Milks Emulsion is strongly recommended to run-down nervous people, and it has produced amazing results in many cases of tuberculosis of the lungs. Chronic stonnach trouble and constipation are promptly relieved-usu-

ally in one day. It works like magic on coughs and colds. This is the only solid emulsion made, and so palatable that it is eaten with a spoon like ice cream. A truly wonderful medicine for sick, weakly children. No matter how severe your case, you are urged to try Milks Emulsion under this guarantee—Take six bottles home with you, use it according to directions

FRONT AS A WRITER

VALUABLE ARTICLE IN THE CENTURY MAGAZINE.

Deals With Building of Camp Greenleaf and Work Accomplished There.

In a current issue of the Century magazine is an article by A. F. Har-lowe, of Chattanooga, on "Making An Army Doctor." The article is in-dexed on the cover at the top of all

dexed on the cover at the top of all others and occupies a place in the middle of the book. It has a number of illustrations, all taken from life at Camp Greenleaf. Some of them are double-page pictures.

The writer is engaged in the commercial art and advertising business, with an office at 622 1-2 Market street, and spends his spare time writing for magazines. Some of his articles have been published in Country Life, and Forfest and Stream. He has also contributed to the Railroad Men's magazine, and does quite a good deal of work for System magazine.

System magazine.

"The Making of An Army Doctor" is the first he has had accepted by Century magazine, and it is understood that he was paid a sum of between \$100 and \$200 for the article.

Surgery Not Pre-sminent.

In considering how and why an army doctor is now being given an intensive special training, he says in

part;
"There was a time when he was referred to categorically as an army surgeon, and his chief work was the surgeon, and his chief work was the cleansitg of wounds and the amputation of limbs already shot away. If the soldier was sick, the doctor gave him a pill. But that day is long since past. Surgery no longer stands pre-eminent among the accomplishments of the military medico; he must know a score of other things equally well. For ex-ample, one thing that perhaps sur-passes surgery in importance is what the medical profession calls prophylaxis, or the prevention of disease. The first duty of the medical man is to keep the soldier well, and it is a proud record for him if he can bring his men through the year with few or no cases of certain diseases which or no cases of certain diseases which are fairly common in any commun-ity and which are looked upon by civilians as regrettable but almost unpreventable. The army doctor not only knows what should be done, but he has the power to do it. He pro-mulgates a code of hygiene for the soldier and sees that it is enforced." After mentioning a scheme of

training camps for medical officers put in operation in the summer of "Farly last winter the camp at Fort Benjamin Harrison was transferred to Fort Oglethorpe, and that at Des Moines was merged with the one at Fort Riley. During last summer most of the schools of the Fort Riley camp were removed to Fort Ogle thorpe. The Camp Greenleaf, great school and cantonment,

comes of prime importance to mili-tary medicine in this country. As these words are being written, it houses over 2,000 student officers and 25,000 men. Greenleaf Largest Camp. Camp Greenleaf is therefore the largest army medical university ever assembled in any country. When it was first established, the only available site was not very prepossess-ing in appearance, being rather low and marshy, with a sluggish

brook meandering through it. It looked like a paradise for mosquitoes, but as a result of labor and under-standing it is a matter record that in two summers there has been scarcely a fly or a mosquito seen in Camp Greenleaf, and disease is al-most nonexistent." One medical student is quoted as saying his work at Greenleaf had

been worth thousands of dollars to him professionally. The writer look-ing to the future says: "There will be a skilled physician

every community, trained in the

great school of the army.
"The army medical staff and the instructors at the training camp are all idealists, but men who know how to realize their ideals if given power

"They behold a great public sanitary service, nation-wide, maintained by the government, before which dirt and pestilence will flee away and be seen no more. There will be no more slums in the cities, no pestmore slums in the cities, no pest-houses, no polluted water, no germ-infested dairies, no dirty restaurant and hotel kitchens. There will be no more grocery stores where the cat sleeps, in the cracker-box and the flies swim in the can of week-old buttermilk. The fly and the mos-quito and the rat will be banished from the land forever, and with them will go malaria, typhoid fever, cholera, yellow fever, bubonic plague and other diseases unpleasant to mention.

"Already the people are awakening to the value of santation such as the army is now practicing. Chat-tanooga and other cities adjacent to army camps have taken a hint of what it really means to clean up. ing place, and liquor has become a curlosity.

"What a glorious thought it is, to make a nation clean and free from contagion! Out of the wreck and horror of this war many blessings will come, and not the least of them the physical purification of America as a result of the augmented training and the broadened vision of the

"To say that Margaret Matze-nauer's first recital appearance in Washington, D. C., was a great suc-cess, is putting it mildly. Indeed, to judge by the following notices it was more in the nature of a triumph. "Mme. Matzenauer belongs among the few great contraltos of operatic

SONG FROM FRANCE

Miss Anita George Receives Popular French Song With the Boys Over There. A song entitled "Madelon", which has made such a hit in France among the soldier boys, has been received here by Miss Anits George, from her cousin, Harry W. Jones. He writes that it is the big hit over there now among the American boys, and tha the people back home should learn ft, as the soldiers will be singing it as the soldiers will be singing it when they return. The words are written in French, in the copy sent to Miss George and are by Louis Husquet, a Frenchman. The music was composed by Camille Robert. While this song is very popular in France this is the first copy that has been received in Chattanooga.

Young Mr. Jones was a Knoxville boy and was stationed at Fort Oglethorpe for a short time. He is now a sergeant in the aerial squad.
